Why the International Program should not be taken a way. To many students, this program is the first thing that gives hope to international students. This student leave their home country to study in this school. This program giving them the tools to get to their goals. These students have no idea on how is school and the community it's in works. So the program step in and shows the students this way. English for this students is a second language and they need someone to focus on what their needs are on how to speak and write English well. The other things that these students need is to have a network of friends. Because most of these students leave everyone they know behind to get their education and need to have friends to talk to work with and have fun. So before thinking about cutting this program I hope you really look at what it would mean for this students and for the school as a whole. Think about where would these students turn to if they do not have program to help get throw a big decision they have made to leave their home country and study at this school.
