My name is Bernard Edosomo. I am an international student. The ELC is a good platform to start your college career from. I started with 113 C and have learned valuable information which helps me in English but also my other classes and how to speak English better. I know there is always someone to help me with a problem by having this is a benefit which I am very thankful of.

I can advise people to come to UWU because the friendliness and professionalism of the ELC is very, very good.

This course should be kept because it offers a opportunity for international students to start from a good beginning and carry out their work here and also graduate here.

By providing this class and telling the students they should appreciate it will show better marks and will also keep the student happy. Most student can be an UWU’s alumni in a few years and then contribute something back to UWU.
