It is precious that young people want to get education nowadays, and students who are given good enough education will be people who develop society someday. Cutting University's budget is equal to cutting the future.

It is also really hard for international students because we have to pay almost as twice tuition as residents. I will have to drop out of school and go back to my country because of that. More students have to stop studying. Furthermore, all ESL classes are important. Most international students can take major classes with well-prepared English because of all ESL classes. They give us a lot of opportunities to get used to American life especially when we come here for the first time.
