March 23, 2010

Dear Dean Hudgins,

I am a student of the E.S.L program 128 at U.N.L.V. I would like to continue with my class, because it helps my business. Also it helps me communicate better with my American society, and also to get a degree some day in my life. Without this program from the English Center Language most of my plans would be ruin. I would have to start all over again, in a different place or I might not be able to continue with my studies. This class is excellent, because of my professor and the good environment that is what makes this institute the best.

I hope this message caught your attention to decide not to get ride of the E.S.L program. This is because for the international students as my self is important to learn English as a second language. This helps us be part of the United States of America and be successful.

Thank you,

Iveth A. Sanabria
