ELC and the English courses to the international students
in many ways. When I came to the University in last fall,
I took the ELC courses first, and it helped me a lot while
I was taking these classes, I could learn a lot of
English skills for the next level of major courses in the future.
These courses made me to well prepared for its higher levels.
Better school, lived in the future classes, writing skills are very
important for me to write in any major developed courses
and test others for resume later. Writing is the most
important thing in the University. That is the common
thing that the students cannot move up to the graduation
if they don't improve their skills or levels. The ELC courses
help the international students to keep their level higher.
What we learn in UNLV will be the benefits to international
students to write the resume and get their jobs
later. The international students should well prepared
before their jobs. These courses, which are Eng 113 and Eng 114,
helps the international students a lot and they can receive what they didn't take in English 101 and 102.

The international students can focus more about their learning and they can catch their levels can easier to the native students by English 117 and 114.
