Dear President's Review Committee:

Nowadays, more and more people come to America. As English is the second language to most of them, it is necessary to improve their English skills for them to get a better job and live a more satisfied life. On this, English Language Center plays an important role because it helps lots of people understand what they have learned in their classes and adapt to the new environment and the American life.

The first reason why the English Language Center is important is that people or students can understand what they have learned in their classes and absorb the knowledge better after learning English in the English Language Center. Imagine this, if someone cannot understand what the professor is talking about, he or she may feel bored of this course. Thus, he or she may against the professor or even the course.
Besides, he or she might not want to talk with others in English because he or she thinks that English is too hard to them. How can he or she become a positive learner with this kind of attitude? However, if he or she goes to the English Language Center, his or her English skills may be improved fast. Then he or she will feel good and confident with their English. With this positive attitude, he or she will work harder to catch up with other students. Gradually, he or she might like the course and become one of the top students. All of these good results are from learning in the English Language Center.

Additionally, learning English and improving English skills will help people adapt to the American life faster. For this, the English Language Center is the best choice. There people can make a lot of
friends who come from other countries and have different backgrounds. The only way for people to communicate with each other is talking in English. In this way, people's English will be better and better. Furthermore, the English Language Center is like a very small American society—people come from different countries and have different cultures. This will help people understand the American society better and adapt to it more quickly.

In sum, the English Language Center is really necessary for the foreigners who speak English as their second language. Students understand the decision of the university, but we still hope that the English Language Center can remain in the university.

Student,

Yvonne Cho
