Plug the following raw data of test scores into SPSS:

93, 62, 51, 80, 58, 62, 80, 66,
74, 79, 93, 79, 80, 91, 93, 80

1. What is the cumulative frequency of a score of 79?

2. What is the cumulative percent of a score of 79?

3. In the above scenario, having a cumulative percent of 75% means that:
   
   A. 75% scored higher than a 74 on the test
   B. 75% scored an 80 or below on the test
   C. 75% scored below an 80 on the test
   D. 75% scored at or below a 79 on the test
   E. 74% scored at or below a 80 on the test

4. What is the mode?

5. What is the median?

6. What is the mean?

Hand in SPSS output for the above information
