The Southern Nevada Water Authority (SNWA) is pursuing a water development project referred to as the "Clark, Lincoln and White Pine Counties Groundwater Development Project". This is a major project that would take years and billions of dollars to bring on line. In order to complete this project SNWA will have to overcome technical, environmental, political, regulatory, and financial obstacles. Identify a substantial obstacle to this project, then in no more than 1 single spaced page you are to explain that obstacle and suggest a strategy through which it can be overcome. You can discuss this assignment with anyone that you wish; however, the final product must be your own work. Please cite references where appropriate.
