Revised Schedule for GEOL 701 Proposal Presentations

All student presentations will be held in TEC 104 beginning sharply at 1:00 PM. Each presenter will be allotted 12 minutes to present their thesis proposal, followed by a three minute question and answer session. We will complete four presentations in each class period, so strict adherence to the schedule is essential. These presentations are open to faculty and students as space allows, with preference given to faculty supervisors of the presenters. A revised schedule will be circulated in the unlikely event of a change.
