INFORMATION ABOUT RESOURCES

*Personal Trainer Resources* are materials designed to be used with *Comprehending Behavioral Statistics*, the textbook by Russell T. Hurlburt, published by Kendall Hunt Publishing Company. All materials are Copyright 2012 by Russell T. Hurlburt, Ph.D. The original purchaser of *Comprehending Behavioral Statistics* has the right to make as many copies as desired for his or her own personal use. Statistics instructors adopting *Comprehending Behavioral Statistics* for their classrooms have the right to make copies for students in their classes. All other rights are reserved.

Resources are all written by Dr. Hurlburt, and are designed to be identical to the textbook in notation, style, format, look, and feel. To ensure this, they have been created by exactly the same editing/composition process as the textbook, and they begin at exactly the points that the textbook leaves off.

The Resources are all optional in the sense that they can all be omitted without loss of continuity in the textbook.

You should think of the Resources just as you would textbook pages, except they are provided in *Personal Trainer* instead of on paper pages. You can print these Resources if you desire, and if you do, your printer output will look just like textbook pages, using the same design, symbols, and terminology. Thus the Resources can be used with the assurance that they will integrate seamlessly with the textbook.

Why Resources? Two reasons: (a) Moving optional material to the Resources removes distractions from the main flow of the textbook but keeps the material readily available; and (b) this keeps the textbook shorter, allowing us to supply *Personal Trainer free* for your use.
