This detailed survey of 20th-century Europe seeks to identify the political, social, cultural, and economic sources of both Europe's relative, though geographically uneven, prosperity as well as its most intractable problems in the present day. We shall concentrate on the major theme of ethnic cleansing, genocide, and population movements in the 20th century.

The course requires direct, active, and fanatical engagement on the part of the instructor and students alike. Fanaticism is assessed primarily in terms of the degree and depth of participants' preparation for class and eagerness to raise questions and engage in discussion and debate. The instructor will periodically post a set of questions, propositions, theses, and or triads on the course's website. These may serve as the basis for discussion in subsequent sessions, so students should check in with the website frequently. Participation is crucial to the course, and the instructor's assessment of student engagement in the course will be of substantial significance in determining final grades. Absences will be highly detrimental to students' grades.

The vast majority of the readings are available for purchase at the library, and when possible these will also be placed on reserve at the library. A few readings have been uploaded to the webcampus site for this course in scanned form. This is done in order to ensure conformity with fair use provisions of copyright law. These should be downloaded by students and, preferably, printed for intense scrutiny. Past experience suggests that students often relate to such readings with scorn or indifference. Maintaining the standards of fanaticism for this course may thus require that nasty mechanisms be introduced to ensure that students relate to these readings with the seriousness that they deserve.

There are three major writing assignments for the course. The first is a fictitious primary account that students will be asked to generate on the basis of course material, limited consultation with outside sources, and their own fertile historical imaginations. The second and third exercises entail the writing a comparative review of two or more scholarly articles, to be located by the students using the library’s resources. Fanaticism is required for the completion of all exercises. Details are available on the website. All papers are due at the beginning of class on the given date. Electronic submissions are considered on time if sent before the beginning of class. Any late paper will be downgraded 5 points per calendar day and must be accompanied by a one-page, single-spaced explanation for why it is late and why – given that you have this syllabus and have thus been apprised of all due dates well in advance – I should accept it. I vastly prefer submissions in electronic form, but be sure to note the requirements for all electronic submissions. Be sure also to consult the checklist on the web site, which establishes the basic requirements for all papers. Details on the assignments and all the requirements referred to here can be found on the web site.
The course also includes five geography quizzes. These are exciting opportunities for students to exhibit their fanaticism by scoring perfectly. In each case you will be asked to insert the names of different states, and in some cases cities and other geographical features, onto a blank map. Specific expectations may be found on the website. I will allow you to take each quiz a second time (provided that you were present to take it the first time) and will count the higher of the two grades as 1/2 (and the lower as 1/2) for the purposes of computing your grade. However, if you wish to take the quiz a second time, you must do so within one week of the day I return the quizzes to the group and on your own time (i.e. during my office hours). Experience shows that some students’ grades have suffered substantially as a result of an insufficiently fanatical attitude in preparing for such quizzes. Thus good sense – and aspirations towards fanaticism – suggest that students should prepare for the quizzes diligently, responsibly, and – yes – fanatically.

The instructor recognizes that occasionally crises arise involving work, family, and health. Even the most devoted fanatic occasionally encounters problems! In order for me to make an accommodation with you in such a case, I must be informed in a timely manner of the problem, either by the affected student or someone on his/her behalf. Communication is key!
