Planning 101: Part 2

Logic Models

A logical series of statements that link the problems your program is attempting to address (conditions), how it will address them (activities), and what are the expected results (immediate & intermediate outcomes, long-term goals)

Logic Model

Conditions —— Activities —— Outcomes —— Goals

**Conditions**: Problems, issues, assumptions, constraints; often identified through needs assessment.

**Activities**: Specific things that will be done to address the conditions.
**Logic Model**

**Outcomes:** Benefits or changes expected to occur for individuals or populations during or after participating in activities; changes often relate to awareness, knowledge, attitudes, skills, behavior, or conditions; differentiate between short-term (within one year) and long-term (longer than one year). Example: Decrease disruptive student behavior occurrences among 9-12th graders by 30%.

**Goals:** A broad statement of measurable long-term impact; what the activities are ultimately intended to accomplish. Example: To help ensure that all schools are safe, disciplined, and drug-free.

**Logic Model - Applied**

- Specified Intervention Components and Activities
- Chosen Determinants (Risk and Protective Factors)
- Important Sexual Behaviors
- Teen Pregnancy, STD's and HIV
Logic Model - Applied

Specified Intervention Components and Activities
- Unemployment
  - Older sibling has sex
  - Older sister gave birth
  - High crime
  - Older peers
  - Sexually active peers
  - Grades

- Delaying sex
  - Use contraceptives
  - Reduce frequency
  - Reduce sex partners

A reduction in pregnancy, STD's and HIV

---

---

---
**Goal Statement**

To reduce HIV risk transmission & acquisition among bisexual Haitian men ages 20-50 in greater Boston and increase access to HIV services in the community.

**Process Objectives**

<table>
<thead>
<tr>
<th>By 1/06 P. Manager will ensure resources needed for HIV intervention are identified.</th>
<th>By 2/06, P. Manager &amp; staff will develop system &amp; strategy for recruitment.</th>
<th>By 3/06, P. Manager &amp; staff will develop system &amp; strategy for recruitment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>By 4/06, P. Manager &amp; staff will develop system &amp; strategy for recruitment.</td>
<td>By 5/06, staff will develop an all-inclusive bi-annual meeting calendar.</td>
<td>By 6/06, develop an all-inclusive social media strategy.</td>
</tr>
<tr>
<td>By 7/06, P. Manager &amp; staff will develop an all-inclusive bi-annual meeting calendar.</td>
<td>By 8/06, staff will develop an all-inclusive social media strategy.</td>
<td>By 9/06, develop an all-inclusive social media strategy.</td>
