# TABLE OF CONTENTS

EXECUTIVE SUMMARY ........................................................................................................ E-1
LIST OF FIGURES ................................................................................................................ vi
LIST OF TABLES ................................................................................................................... ix
ACKNOWLEDGEMENTS ...................................................................................................... xi
1 INTRODUCTION .............................................................................................................. 1-1
   The Study Area .............................................................................................................. 1-1
   Development Patterns ................................................................................................. 1-2
   Population ..................................................................................................................... 1-2
   Transportation ............................................................................................................. 1-3
   Law Enforcement ......................................................................................................... 1-4
   Pedestrian Crash Problem in Las Vegas Metro Area and Safety Program ............... 1-5
   Goals and Objectives ................................................................................................. 1-5
      Goal .......................................................................................................................... 1-5
      Objectives ............................................................................................................... 1-5
   Project Tasks ............................................................................................................... 1-6
2 ASSEMBLY OF PROJECT TEAM ............................................................................... 2-1
   Stakeholders ................................................................................................................. 2-1
   Non-traditional Partners ............................................................................................. 2-1
3 PROBLEM IDENTIFICATION ....................................................................................... 3-1
   Pedestrian Crash Data Collection .............................................................................. 3-1
   Pedestrian Crash Problem ............................................................................................ 3-1
4 IDENTIFICATION OF HIGH PEDESTRIAN CRASH SITES ........................................... 4-1
   Step-1 Identify Pedestrian Crash Problems ................................................................. 4-1
   Step-2 Address Match Pedestrian Crash Data ............................................................. 4-1
   Step-3 Define Study Area ............................................................................................. 4-1
   Step-4 Identify Pedestrian High Crash Zones in the Study Area ................................. 4-2
   Step-5 Rank Pedestrian High Crash Zones .................................................................. 4-2
   Step-6 Identify High Crash Sites in the Selected Zones .............................................. 4-3
   Results and Discussion ............................................................................................... 4-3
   Unique Characteristics of the Study Area ................................................................. 4-4
1. Maryland Parkway: Flamingo Wash to Sierra Vista Drive ......................... 4-4
2. Harmon Avenue: Paradise Road to Las Vegas Boulevard ....................... 4-5
3. Flamingo Road: Paradise Road to Las Vegas Boulevard ......................... 4-6
4. Bonanza Road: D Street to H Street ......................................................... 4-6
5. Twain Avenue: Cambridge Street to Palos Verde Street ....................... 4-7
6. Lake Mead Boulevard: Pecos Road to Las Vegas Boulevard .................. 4-8
7. Fremont Street: 15th Street to 6th Street ................................................. 4-9
8. Desert Inn Road / Boulder Hwy (1200 ft) ............................................. 4-10
9. Charleston Boulevard: Eastern Avenue to Las Vegas Boulevard ............ 4-10
10. Maryland Parkway: Desert Inn Road to Sahara Avenue ...................... 4-11
11. Bonanza Road: Eastern Avenue to Las Vegas Boulevard ...................... 4-12
12. Downtown ............................................................................................... 4-13
13. Charleston Boulevard: Nellis Boulevard to Pecos Road ....................... 4-14
14. Tropicana Avenue: Pecos Road to Spencer Street ............................... 4-15
15. Flamingo Road / Boulder Hwy (1200 ft) ............................................. 4-15
16. Maryland Parkway: Tropicana Avenue to Flamingo Road .................... 4-16

5 LITERATURE REVIEW .................................................................................. 5-1

Pedestrian Safety Countermeasures ............................................................... 5-1

   Pedestrian Barriers (Railings or Barriers) ................................................. 5-1
   Minimizing Pedestrian Confusion ......................................................... 5-1
   Increase Motorist Awareness ............................................................... 5-1
   ITS Automatic Pedestrian Detection Devices ...................................... 5-2
   Pedestrian Head Start Signal Timing .................................................... 5-2
   Regulatory Sign for Motorist ............................................................... 5-2
   In-Pavement Lighting (Illuminated Overhead Crosswalk) ..................... 5-2

Other Pedestrian Safety Countermeasures .................................................. 5-3

   Pedestrian Countdown Timers ............................................................ 5-3
   Enlarged Pedestrian Signal Heads ....................................................... 5-3
   Animated Eyes Pedestrian Signal Heads ............................................. 5-3
   Animated Eyes ITS Warning Signs That Show Drivers the .................. 5-3
   Direction Pedestrians Are Crossing
Smart Lighting to Warn Drivers That Pedestrians are Crossing ............. 5-3
Under Dark Light Conditions
Danish Offset .......................................................................................... 5-4
Turning Vehicles Yield to Pedestrians Sign ............................................. 5-4
High Visibility Crosswalk Treatment (Marked Crosswalks) .............. 5-4
Advance Stop Line and offset Stop Lines at Traffic Signal Locations.... 5-5
Advanced Yield Markings (Yield Bar) ..................................................... 5-5
ITS Speed Warning Signs ...................................................................... 5-5
Portable speed trailer with Fine Info ....................................................... 5-5
Alternative Technologies Related to ADA ..................................... 5-6

6 SELECTION OF COUNTERMEASURES................................................. 6-1
Analysis and Selection of Countermeasures for Individual Sites .......... 6-1
Site 1: Maryland Parkway / Sierra Vista Drive................................. 6-1
Site 2: Maryland Parkway / Dumont Street ....................................... 6-2
Site 3: Maryland Parkway / Twain Avenue ....................................... 6-2
Site 4: Harmon Avenue / Paradise Road .......................................... 6-2
Site 5: Harmon Avenue: Paradise Road to Tropicana Wash. .......... 6-3
Site 6: Harmon Avenue / Las Vegas Boulevard ............................... 6-3
Site 7: Flamingo Road / Koval Lane .................................................... 6-4
Site 8: Flamingo Road / Paradise Road .............................................. 6-4
Site 9: Bonanza Road / F Street ......................................................... 6-4
Site 10: Bonanza Road / D Street ....................................................... 6-5
Site 11: Twain Avenue: Cambridge Street to Swenson Street ......... 6-5
Site 12: Twain Avenue: Swenson Street to Palos Verde Street ...... 6-6
Site 13: Lake Mead Boulevard / Las Vegas Boulevard .................... 6-6
Site 14: Lake Mead Boulevard / Mc Daniel Street ............................. 6-6
Site 15: Lake Mead Boulevard: Belmont Street to McCarran Street .. 6-7
Site 16: Lake Mead Boulevard / Pecos Road ...................................... 6-7
Site 18: Fremont Street: 11th Street to 8th Street ............................... 6-7
Site 19: Fremont Street: 8th Street to 6th Street .................................. 6-8
Site 20: Desert Inn Road / Boulder Highway (1200 ft) ..................... 6-8
Site 21: Charleston Boulevard / Las Vegas Boulevard......................... 6-8
Site 22: Charleston Boulevard / Maryland Parkway.............................. 6-9
Site 23: Charleston Boulevard / Eastern Avenue ................................. 6-9
Site 24: Maryland Parkway / Sahara Avenue ................................... 6-10
Site 25: Maryland Parkway / Karen Avenue ................................... 6-10
Site 26: Maryland Parkway / Desert Inn Road .................................. 6-10
Site 27: Bonanza Road / Eastern Avenue .......................................... 6-11
Site 28: Bonanza Road / Maryland Parkway ..................................... 6-11
Site 29: Bonanza Road / Las Vegas Boulevard .................................. 6-12
Site 30: Main Street / Fremont Street .............................................. 6-12
Site 31: Main Street / Carson Avenue ............................................... 6-12
Site 32: Fourth Street / Ogden Avenue .............................................. 6-13
Site 33: Fourth Street / Fremont Street ............................................. 6-13
Site 34: Las Vegas Boulevard / Fremont Street ................................. 6-13
Site 35: Las Vegas Boulevard / Carson Avenue ................................. 6-14
Site 36: Las Vegas Boulevard / Bridger Avenue ................................. 6-14
Site 37: Charleston Boulevard / Lamb Boulevard ................................ 6-14
Site 38: Charleston Boulevard: Lamont Street to Lucerne Street ........ 6-15
Site 39: Charleston Boulevard / Nellis Boulevard ............................ 6-15
Site 40: Tropicana Avenue / Spencer Street .................................... 6-16
Site 41: Tropicana Avenue / Eastern Avenue .................................... 6-16
Site 42: Tropicana Avenue / Pecos Road .......................................... 6-16
Site 43: Flamingo Road / Boulder Highway ..................................... 6-17
Site 44: Flamingo Road / Nellis Boulevard ...................................... 6-17
Site 45: Maryland Parkway / Flamingo Road .................................. 6-18
Site 46: Maryland Parkway / Harmon Ave ....................................... 6-18
Site 47: Maryland Parkway / Del Mar .............................................. 6-18
Site 48: Maryland Parkway / Tropicana Avenue ............................ 6-19

Estimated Costs for Deployment and Evaluation of Countermeasures .... 6-19

7 OUTREACH AND AWARENESS CAMPAIGN........................................... 7-1

Questionnaire ............................................................................................ 7-2
Questionnaire Results.......................................................... 7-4
Huntridge Neighborhood Association...................................... 7-4
John S. Park Neighborhood Association.................................. 7-4
East Las Vegas Community Development Corporation .......... 7-5
Pedestrian Survey Project..................................................... 7-6
Related Activities................................................................. 7-7
Presentations........................................................................... 7-9
Prepare professional journal paper(s)...................................... 7-10

8 COMMENTS ON PBCAT.......................................................... 8-1
General Comments............................................................. 8-1
Comments on Contributing Factors ....................................... 8-2
Comments on Crash Typing Module ..................................... 8-2
Comments on Report Section............................................... 8-3
Comments on Countermeasures Section............................... 8-3

9 SUMMARY .................................................................................. 9-1
REFERENCES............................................................................. R-1
APPENDICES
Appendix A: EAC Meetings Summary................................. A-1
Appendix B: Site Plans ............................................................. B-1
Appendix C: Neighborhood Association Presentation .............. C-1
Appendix D: Summary of Media Coverage............................. D-1
LIST OF FIGURES

1. Cities and Major Streets in the Las Vegas Metropolitan Area .................................. 1-7
2. An Example Showing Local Transit System Serving a Disabled Person .................. 1-8
3. Pedestrian Activity at a Transit Stop on Flamingo Road at Noon ............................ 1-8
4. Pedestrian Xing a “High Speed” Major Arterial to Board a Transit Bus .................. 1-9
5. Pedestrians Xing a “High Speed” Major Arterial after Alighting Transit Bus .......... 1-9
8. Distribution of Hotel / Casinos in the Las Vegas Metropolitan Area ..................... 3-4
9. Spatial Distributions of Pedestrian Crashes on Wednesdays ................................. 3-4
10. Spatial Distributions of Pedestrian Crashes on Saturdays .................................... 3-5
11. Spatial Distributions of Crashes Involving Pedestrians Under Influence of.............. 3-5
    Alcohol / Drugs (Red–Fatal; Blue–Injury)
12. Percent of Pedestrian Crashes by Age Group ...................................................... 3-6
13. Percent of Pedestrian Crashes by Road Functional Classification ........................ 3-6
14. Spatial Distribution of Midblock Pedestrian Crashes (Red–Fatal, Blue–Injury) ....... 3-7
15. Percent of Pedestrian Crashes by Pedestrian Action ............................................ 3-7
16. Fatal and Injury Pedestrian Crashes in the Las Vegas Metro Area ....................... 4-18
17. Pedestrian Crash Rates by Zip code in Las Vegas Metro Area .............................. 4-19
18. Selected High Risk Zones in the Study Area ....................................................... 4-20
19. Maryland Parkway: Flamingo Wash to Sierra Vista Drive .................................. 4-21
20. Harmon Avenue: Paradise Road to Las Vegas Boulevard .................................. 4-22
21. Flamingo Road: Paradise Road to Las Vegas Boulevard .................................... 4-23
22. Bonanza Road: D Street to H Street ................................................................. 4-24
23. Twain Avenue: Cambridge Street to Palos Verde Street .................................... 4-25
24. Lake Mead Boulevard: Pecos Road to Las Vegas Boulevard ............................. 4-26
25. Fremont Street: 15th Street to 6th Street ......................................................... 4-27
26. Desert Inn Road and Boulder Highway Intersection ........................................ 4-28
27. Charleston Boulevard: Eastern Avenue to Las Vegas Boulevard ....................... 4-29
28. Maryland Parkway: Desert Inn Road to Sahara Avenue ................................... 4-30
29. Bonanza Road: Eastern Avenue to Las Vegas Boulevard .................................. 4-31
30. Downtown Area ....................................................................................................... 4-32
31. Charleston Boulevard: Nellis Boulevard to Pecos Road........................................ 4-33
32. Tropicana Avenue: Pecos Road to Spencer Street................................................ 4-34
33. Flamingo Road and Boulder Highway Intersection............................................. 4-35
34. Maryland Parkway: Tropicana Avenue to Flamingo Road................................. 4-36
35. Total Number of Pedestrian Crashes in Each Zone ............................................ 4-37
36. Percent of Pedestrian Crashes by Location in Each Zone..................................... 4-38
37. Percent of Pedestrian Crashes by Age Group in Each Zone................................. 4-39
38. Percent of Pedestrian Crashes for Selected Age Groups in Each Zone ................. 4-40
39. Percent of Day Time and Night Time Pedestrian Crashes in Each Zone................. 4-41
40. Percent of Pedestrian Crashes by Injury Type in Each Zone............................... 4-42
41. High Pedestrian Risk Locations in Las Vegas Metropolitan Area....................... 4-51
42. High Pedestrian Risk Locations in Downtown, Las Vegas ................................. 4-52
43. Pedestrian Channelization (Railings or Barriers).................................................. 5-7
44. Pedestrian Countdown Signal ............................................................................. 5-7
45. Advanced Warning for the Motorists................................................................. 5-8
46. ITS Automatic Pedestrian Detection Devices....................................................... 5-8
47. Regulatory Sign for Motorist ............................................................................. 5-9
48. In-Pavement Lighting (Illuminated Crosswalk)................................................... 5-9
49. Enlarged Pedestrian Signal Head ....................................................................... 5-10
50. Animated Eyes Pedestrian Signal Heads ............................................................... 5-10
51. Animated Eyes ITS Warning Signs for Drivers.................................................... 5-11
52. Smart Lighting to Warn Drivers That Pedestrians are Crossing......................... 5-11
under Dark Light Conditions
53. Danish Offset ...................................................................................................... 5-12
54. Turning Vehicles Stop/Yield for Pedestrians....................................................... 5-12
55. Advanced Stop Line and Offset Stop Lines at Traffic Signal Locations ............... 5-13
56. Advanced Yield Markings .................................................................................. 5-13
57. Portable Speed Trailer ...................................................................................... 5-14
58. Dynamic Signals Restricting RTOR ................................................................. 5-14
59. High Visibility Cross Walk Treatment ............................................................... 5-15
60. Median Refuge ........................................................................................................5-15
61. Pedestrian Activated Signal Heads ......................................................................5-16
62. Total Number of Pedestrian Crashes in Each Site ..............................................6-21
63. Percent of Pedestrian Crashes by Location in Each Site ....................................6-22
64. Percent of Pedestrian Crashes by Age Group in Each Site .................................6-23
65. Percent of Pedestrian Crashes for Selected Age Groups in Each Site .................6-24
66. Percent of Day Time and Night Time Pedestrian Crashes in Each Site ...............6-25
67. Percent of Pedestrian Crashes by Injury Type in Each Site .................................6-26
68. How Often Do People Walk? ..............................................................................7-11
69. Pedestrian’s Opinions on the Major Cause for Pedestrian / Vehicle Conflicts ... 7-11
70. Pedestrian’s Opinions on Level Of Service Offered by the Streets of Las Vegas...7-12
71. Pedestrian's Opinions on Whose Fault it is when a Vehicle hits a Pedestrian ...... 7-12
72. Where do Pedestrians Cross Streets? ..................................................................7-13
73. Mid-block Crossing Survey Result, Maryland Parkway Northbound Vehicles, ....7-13
   Morning Average
74. Mid-block Crossing Survey Result, Maryland Parkway Southbound Vehicles, ....7-14
   Morning Average
75. Mid-block Crossing Survey Result, Maryland Parkway Northbound Vehicles, ....7-14
   Mid-day Average
76. Mid-block Crossing Survey Result, Maryland Parkway Southbound Vehicles, ....7-15
   Mid-day Average
77. Mid-block Crossing Survey Result, Maryland Parkway Northbound Vehicles, ....7-15
   Evening Average
78. Mid-block Crossing Survey Result, Maryland Parkway Southbound Vehicles, ....7-16
   Evening Average
LIST OF TABLES

1. Summary of crashes by severity in Clark County, NV .............................................. 1-10
2. EAC Meetings Summary ................................................................................................. 2-2
3. Pedestrian Crashes in Each Pedestrian High Crash Zone ........................................ 4-43, 4-44
4. Percent of Pedestrian Crashes in Each Pedestrian High Crash Zone .................... 4-45, 4-46
5. Population Characteristics of Each Pedestrian High Crash Zone ......................... 4-47
6. Traffic and Road Conditions of Each Pedestrian High Crash Zone ..................... 4-48
7. Pedestrian Crash Rates by Zone .............................................................................. 4-49
8. Ranking of Pedestrian High Crash Zones ............................................................... 4-50
9. Summarized Percent of Pedestrian Crashes at Each Site ...................................... 6-27
10. Sites, Countermeasures, and Cost Estimates .......................................................... 6-28
11. Unit Cost Estimates for Pedestrian Safety Countermeasures ................................ 6-29, 6-30
12. Data Collection and Analysis Efforts for Existing Conditions (Task 2) ............... 6-31
13. Data Collection and Analysis Efforts after Implementation of Countermeasures... 6-32 (Task 3)
14. Sites, Countermeasures, and Cost Estimating for Phase 2 .................................... 6-33
15. Cost of Deploying and Evaluating Pedestrian Safety Countermeasures ............. 6-34 in Pedestrian High Crash Zones
16. Detailed Project Budget ............................................................................................ 6-35
17. Summary Project Schedule ...................................................................................... 6-36
22. Level of Effort for Entire Project Duration .............................................................. 6-41
23. Level of Effort for Task 0.0 - January 2003 to June 2006 .................................... 6-42
(Entire Project Duration)
25. Level of Effort for Task 1.2 - January 2003 to June 2006 ..............................6-44
(Entire Project Duration)
(Entire Project Duration)
27. Level of Effort for Task 2.2 - January 2003 to June 2006 ..............................6-46
(Entire Project Duration)
28. Level of Effort for Task 2.3 - January 2003 to June 2006 ..............................6-47
(Entire Project Duration)
(Entire Project Duration)
30. Level of Effort for Task 3.2 - January 2003 to June 2006 ..............................6-49
(Entire Project Duration)
31. Level of Effort for Task 3.3 - January 2003 to June 2006 ..............................6-50
(Entire Project Duration)
32. Level of Effort for Task 4.0 - January 2003 to June 2006 ..............................6-51
(Entire Project Duration)
33. Level of Effort for Task 5.0 - January 2003 to June 2006 ..............................6-52
(Entire Project Duration)
34. Level of Effort for Task 6.0 - January 2003 to June 2006 ..............................6-53
(Entire Project Duration)
35. Level of Effort for Task 7.0 - January 2003 to June 2006 ..............................6-54
(Entire Project Duration)
36. Budget Detail by Individual and By Task - January 2003 to June 2006............6-55
(Entire Project Duration)
