A 3-year Doctoral Graduate Research Assistantship (DGRA) has just become available – starting in the Fall 2014 semester. The successful candidate will work with Dr. Gabriele Wulf in the Department of Kinesiology and Nutrition Sciences. Her research group’s emphasis is on factors that influence motor skill learning. Current studies are related to the effects of attentional and motivational variables (e.g., autonomy support, self-efficacy). Candidates should have a Master’s degree in kinesiology, sport science, exercise science, psychology, or related field, or a DPT. Good writing and presentations skills are required. Furthermore, knowledge of research methods and statistics is expected.

The DGRA will be funded from Fall 2014 - Spring 2017, will receive a $13K or $15K base stipend (pre- and post-advancement to candidacy, respectively) and standard GA benefits (tuition, optional health insurance, etc.).

For further information about the position, please contact:
